### **The Challenge of Childhood Diabetes: Family Strategies for Raising a Healthy Child**

was written by psychotherapist Laura Plunkett and her mother, former Boston Globe columnist Linda Weltner. It's the true story of the Plunkett's son Danny and the fami-

ly's struggle to cope with his type 1 diabetes. It's a sometimes harrowing story of a journey from crisis to competence: Danny has attained and maintained near-normal blood sugars for the past two years, something that is rare in pediatric endocrinology. This is a family that has tried almost everything, and their successes and failures form a guide for other families still reeling from a recent diagnosis or still having trouble controlling their children's blood sugar levels.

The book will be published in August. You can order a copy at
